About Me

I am a Software Engineer with over 1 year of professional experience and a Cum Laude degree in Informatics Engineering. Currently, I develop and maintain a Hospital Management System, delivering production features and resolving operational issues in a healthcare environment where system reliability is critical. My experience includes UI design, database design, and full-stack application development using JavaScript, SQL, PHP, Java, React, Next.js, NestJS, and C#. Looking ahead, I am eager to contribute to impactful software projects, expand my expertise in modern software development, and continuously improve the quality and scalability of the systems I build. Currently, I develop and maintain a Hospital Management System in a healthcare environment where accuracy, reliability, and system stability are critical. In this role, I have delivered 10+ production features, resolved operational issues, and contributed across the full development lifecycle, including UI design, database design, and application development. I am proficient in JavaScript, SQL, and PHP, with professional experience in Java and additional experience with React, Next.js, NestJS, and C#, supported by strong problem-solving, adaptability, and collaboration skills. By combining hands-on experience in business-critical systems with a continuous learning mindset, I am prepared to contribute effectively and deliver dependable software solutions in challenging development environments.

Education

Universitas Musamus

Aug 2020 - Jul 2024

Bachelor, Informatics Engineering | GPA: 3.88

- Earned a Bachelor's Degree with Cum Laude honors "IMPLEMENTASI ALGORITMA DRUNKARD WALK PADA APLIKASI PERMAINAN KEKEBALAN TUBUH MENGGUNAKAN GAME ENGINE UNITY"

Revou

Jun 2025 - Jan 2026

Full Stack Software Engineering Student

- Pass every module and got Certificate of Achievement

Working Experiences

Software Engineer | RSUD Merauke

May 2025 - Present

- Monitored system operations to ensure uninterrupted 24/7 connectivity to the database, enabling the system to run smoothly around the clock.
- Developed a Hospital Management Information System using Java, adding 15+ features to improve hospital services with production-ready functionality usable by many users.
- Monitored user data and system issues with 24/7 on-call coverage to demonstrate readiness to respond quickly and ensure reliable operations.
- Installed network infrastructure and hardware to connect users to the system, successfully connecting 20+ users and enabling reliable access.

Project Experiences

Photo Booth Web App | Merauke

Jun 2026 - Present

- Built backend and frontend to deliver an admin dashboard and client page in under a week, enabling rapid integration of Midtrans as a payment gateway and supporting fast single-page application development.

PORTOFOLIO WEBSITE | Merauke

Jun 2026 - Jun 2026

- Built a lightweight, responsive 3D portfolio website using Vite, React, Three.js, and TailwindCSS to showcase optimization skills in developing web 3D experiences.

EnglishPath | RevoU Full Stack Software Engineering

Oct 2025 - Jan 2026

- Designed the UI, database, and implemented back-end and front-end code with a RESTful API, delivering admin tracking and grading dashboards plus student course, lesson, quiz, submissions, and authorization flows that demonstrated proper full-stack web development.

CELL IN ROGUE | Universitas Musamus

Apr 2024 - Jun 2024

- Designed game UI and implemented coding to enable character movement, shooting enemies, earning skills and attribute upgrades, and procedural level generation, demonstrating end-to-end delivery under strict deadlines.

Skills

Hard Skills: Java, HTML, PHP, JavaScript, Nest js, Next js, React, MySql **Soft Skills:** Communication, Problem solving, Adaptability, English (Passive), Bahasa Indonesia (Active) **Tools:** VsCode, Netbeans, Unity

Certifications

[Certificate of Achievement](#), Issued by Revou
